EDUCATION

University of South Carolina
BS in Computer Science

Spring 2025

EXPERIENCE

Global Shop Solutions

May 2024 - Aug. 2024

Software Analyst

Spring, TX

- Created custom dashboard views for internal company service website, using DevExpress dashboard designer
- Converted stored SQL procedures into custom queries to be used by front-end architecture to build dashboards

Global Shop Solutions

May 2023 - Aug. 2023

Software Test Engineer

Spring, TX

- Refactored 8000 CRUD unit tests to implement testing for company database migration
- Continuously debugged new failing CRUD tests to allow for migration between Pervasive and Postgres database
- Used Git Desktop to maintain version control while refactoring & testing code utilized by development team

Global Shop Solutions

May 2022 - Aug. 2022

Software Engineer Intern

Spring, TX

- Updated old UI from COBOL to Visual Basic .NET using DevExpress UI/UX tools and the .NET Framework
- Worked with the service team to analyze user requirements and implement user-friendly UI
- Actively involved in analysis, design, and test-driven development while following Agile methodology in the SCRUM cycle

PROJECTS

BEACON of Hope - AI Based Meal Recommendation System

Aug. 2024 - Present

Systems Architect/Frontend Engineer

UofSC

- Created an AI based meal recommendation system as a full-stack webapp
- Developed a user-friendly front-end, using React.ts and Tailwind, along with the use of RESTful APIs
- Deployed and configured our front-end & back-end on the AWS Cloud using AWS EC2
- **Technology:** HTML/CSS/TypeScript, Python, React.ts, Tailwind, Django, Firebase, AWS EC2, Nginx, Unicorn, Git

Movie Review App - Software Engineering Project

Fall 2024

Backend Developer/Test Analyst

UofSC

- Created a full-stack webapp where users can filter and select movies, purchase tickets, and leave reviews
- Developed back-end APIs in C# using the MVC and .NET WebAPI Frameworks
- Created NUnit testing suite for back-end controllers and services
- **Technology:** C#, HTML/CSS/JavaScript, React.js, .NET Framework, Entity Framework, MySQL, NUnit

Portfolio Website

Aug. 2024

Frontend Developer

Personal

- Created a single page portfolio website that houses my github, resume, linkedin, and email, along with all past coding projects.
- **Technology:** HTML/CSS/Javascript, React.js

SKILLS

Languages: Java, C/C++, Python, HTML/CSS/JavaScript, TypeScript, Visual Basic .NET, C#, R, MySQL, PostgreSQL, Bash
Tech./Frameworks: Git, .NET Framework, Entity Framework, UNIX/Linux, React.js, AWS Cloud

RELATED COURSEWORK

Comp. Sci.: Algorithmic Design I & II, Advanced Programming Techniques, Computer Architecture, Linux/UNIX Fundamentals, Operating Systems, Data Structures & Algorithms, Intro. to Computer Networks, Foundations of Computation, Windows Programming

Math: Calculus I & II, Vector Calculus, Discrete Structures, Applied Linear Algebra, Statistics for Engineers
